Subject guide to volume 52

General methods in microscopy
High resolution transmission electron microscopy (HRTEM)
Holography
Exit wave reconstruction
Three-dimensional reconstruction and stereo microscopy
Electron diffraction
Convergent beam electron diffraction (CBED)
Scanning transmission electron microscopy (STEM)
Reflection electron microscopy and reflection high energy electron diffraction (REM and RHEED)
Electron energy loss spectroscopy (EELS)
Energy-filtered imaging and diffraction
Auger and secondary electron spectroscopy
Scanning electron microscopy (SEM)
Atomic force microscopy (AFM)

Specimen-related methods
Specimen preparation and handling
Microscopic methods, specifically for biological specimens
Microscopic methods, specifically for catalysts and small particles
Microscopic methods, specifically for solid interfaces and multilayers
Microscopic methods, specifically for surfaces
In situ specimen treatment
Radiation effects (experimental)

Tools
Electron microscope design and characterization
Instrument control and alignment
Image detectors
Spectrometers
Miscellaneous instruments

Theories
Electron diffraction and elastic scattering theory, image simulation
Inelastic electron scattering theory
Impact phenomena: Auger, X-ray and secondary electron emission, radiation effects
Contrast transfer theory
Miscellaneous theories

Miscellaneous subjects
Editorials, Announcements, Comments, Reports, Historical notes
Book reviews

Ultramicroscopy 52 (1993) 608–611
North-Holland

ultramicroscopy

Subject index to volume 52

Atomic force microscopy (AFM)
Influence of frictional forces on atomic force microscope images, *O'Shea, Welland and Wong* 52 (1993) 55

Auger and secondary electron spectroscopy
Secondary electron coincidence detection and time of flight spectroscopy, *Mullejans, Bleloch, Howie and Tomita* 52 (1993) 360
Nanometer-resolution surface analysis with Auger electrons, *Liu, Hembree, Spinnler and Venables* 52 (1993) 369

Book reviews
Tables, handbooks, proceedings and a life, *Hawkes* 52 (1993) 205

Contrast transfer theory
Measuring the height of steps on MgO cubes using Fresnel contrast in a scanning transmission electron microscope, *Boothroyd and Humphreys* 52 (1993) 318
The defocus contrast of a θ' precipitate in Al–4wt%Cu: Fresnel fringe analysis applied to an atomically abrupt interface, *Dunin-Borkowski and Stobbs* 52 (1993) 404

Convergent beam electron diffraction (CBED)
New method of Bravais lattice determination, *Zuo* 52 (1993) 459
Reassessment of the symmetry of the 221 PbBiSrCaCuO structure using LACBED and high-resolution SAD: the relevance of Cowley's theory of disorder scattering to a real-space structural analysis, *Goodman and Miller* 52 (1993) 549

Electron diffraction
Electron diffraction from gratings fabricated by electron beam nanolithography, *Ito, Bleloch, Paterson and Brown* 52 (1993) 347
Quantitative electron diffraction – new features in the program system ELD, *Zou, Sukharev and Hovmöller* 52 (1993) 436
High-resolution electron crystallography of protein molecules, *Glaeser and Downing* 52 (1993) 478
Quantitative imaging and diffraction of zeolites using a slow-scan CCD camera, *Pan and Crozier* 52 (1993) 487

Electron diffraction and elastic scattering theory, image simulation
Coherence and multiple scattering in "Z-contrast" images, *Treacy and Gibson* 52 (1993) 31
A method for crystal potential retrieval in HRTEM, *Beeching and Spargo* 52 (1993) 243
Simulating the exit wave function for uniformly disordered systems, *Chevalier and Hytch* 52 (1993) 253
Spatial coherence effects in the use of high resolution approaches for the characterisation of the compositional abruptness of an interface, *Stobbs and Stobbs* 52 (1993) 267
Direct determination of crystal and surface structures in THEED, *Peng and Dudarev* 52 (1993) 312
Measuring the height of steps on MgO cubes using Fresnel contrast in a scanning transmission electron microscope, *Boothroyd and Humphreys* 52 (1993) 318
Thickness effects in ADF STEM zone axis images, *Hillyard and Silcox* 52 (1993) 325
Imaging elastic strains in high-angle annular dark field scanning transmission electron microscopy, *Perovic, Rossouw and Howie* 52 (1993) 353
Distorted wave approach to diffuse scattering in THEED and RHEED, *Dudarev, Peng and Whelan* 52 (1993) 393
Bloch wave symmetry in electron diffraction, *Gjønnes and Taftø* 52 (1993) 445
Thermal diffuse scattering in high-resolution electron holography, *Wang* 52 (1993) 504
Simulation of electron diffraction patterns from partially ordered layer lattices, *Treacy, Newsam and Deem* 52 (1993) 512
Diffuse scattering and image contrast of tweed in superconducting oxides: simulation and interpretation, *Zhu and Cai* 52 (1993) 539
Reassessment of the symmetry of the 221 PbBiSrCaCuO structure using LACBED and high-resolution SAD: the relevance of Cowley's theory of disorder scattering to a real-space structural analysis, *Goodman and Miller* 52 (1993) 549

Editorials, Announcements, Comments, Reports, Historical notes
Foreword to Aspects of Electron Microscopy, Diffraction, Crystallography and Spectroscopy, *Smith and Spence* 52 (1993) iii

Elsevier Science Publishers B.V.

Electron energy loss spectroscopy (EELS)
Low-dose thickness measurement of glucose-embedded protein crystals by electron energy loss spectroscopy and STEM dark-field imaging, *Leapman, Brink and Chiu* 52 (1993) 157
Electronic structure and dielectric function of oxide superconductors via transmission EELS with a cold field emission TEM, *Wang, Zhang and Dravid* 52 (1993) 523

Electron microscope design and characterization
Commercial spectrometer modifications for energy filtering of electron diffraction patterns and images, *Holmestad, Krivanek, Høier, Marthinsen and Spence* 52 (1993) 454
Experimental low-voltage point-projection microscopy and its possibilities, *Spence, Qian and Melmed* 52 (1993) 473
High-spatial-resolution analysis of Ge layers in Si, *Libera, Smith, Tsung and Eaglesham* 52 (1993) 564
0.1 nm information limit with the CM30-FEG-Special Tübingen, *Lichte, Kessler, Lenz and Rau* 52 (1993) 575
Progress towards quantitative high-resolution electron microscopy, *Smith, De Ruijter, McCartney and Weiss* 52 (1993) 591

Energy-filtered imaging and diffraction
Commercial spectrometer modifications for energy filtering of electron diffraction patterns and images, *Holmestad, Krivanek, Høer, Marthinsen and Spence* 52 (1993) 454

Exit wave reconstruction
Error analysis of crystalline ptychography in the STEM mode, *McCallum and Rodenburg* 52 (1993) 85
A method for crystal potential retrieval in HRTEM, *Beeching and Spargo* 52 (1993) 243

High resolution transmission electron microscopy (HRTEM)
Analysis of power spectra of high resolution electron micrographs, *Anstis, Auchterlonie and Barry* 52 (1993) 167
Quantitative method of assessing the nature of local order from HREM images for SRO on crystalline sublattices, *Hytch and Chevalier* 52 (1993) 415
New complex structures in the cesium–niobium–tungsten–oxide system revealed by HREM, *Lundberg and Sundberg* 52 (1993) 429
Progress towards quantitative high-resolution electron microscopy, *Smith, De Ruijter, McCartney and Weiss* 52 (1993) 591

Holography
Optimized sampling schemes for off-axis holography, *Ishizuka* 52 (1993) 1
Deconvolving lens transfer functions in electron holograms, *Kawasaki and Rodenburg* 52 (1993) 248
Experimental low-voltage point-projection microscopy and its possibilities, *Spence, Qian and Melmed* 52 (1993) 473
Thermal diffuse scattering in high-resolution electron holography, *Wang* 52 (1993) 504
0.1 nm information limit with the CM30-FEG-Special Tübingen, *Lichte, Kessler, Lenz and Rau* 52 (1993) 575

Image detectors
Analysis of electron image detection efficiency of slow-scan CCD cameras, *Ishizuka* 52 (1993) 7
High-sensitivity lens-coupled slow-scan CCD camera for transmission electron microscopy, *Fan and Ellisman* 52 (1993) 21

Impact phenomena: Auger, X-ray and secondary electron emission, radiation effects
Secondary electron coincidence detection and time of flight spectroscopy, *Mullejans, Bleloch, Howie and Tomita* 52 (1993) 360

In situ specimen treatment
In situ domain multiplication and migration in the antiferroelectric ceramic PLSnZT, *De Graef, Clarke and Speck* 52 (1993) 179
HREM observations of the conversion of β-Sn into $PtSn_4$ in the Pt–Sn thin film system, *Dufner* 52 (1993) 276
Analysis of time-resolved, in-situ change in high-resolution electron microscopy, *Kang and Eyring* 52 (1993) 377
The effect of an electric field on the crystallization of gel-derived alumina precursors observed in situ in the TEM, *Tong, Wheatley and Eyring* 52 (1993) 388

Inelastic electron scattering theory
Does phonon scattering give high-resolution images?, *Rez* 52 (1993) 260

Instrument control and alignment
A simple concept for better alignment and simplified operation of a transmission electron microscope, *Wilbrandt* 52 (1993) 193
Telemicroscopy, *Fan, Mercurio, Young and Ellisman* 52 (1993) 499

Microscopic methods, specifically for biological specimens
Low-dose thickness measurement of glucose-embedded protein crystals by electron energy loss spectroscopy and STEM dark-field imaging, *Leapman, Brink and Chiu* 52 (1993) 157

Microscopic methods, specifically for catalysts and small particles

Comparative study of supported catalyst particles by electron microscopy methods, *Yao, Smith and Datye* 52 (1993) 282

Direct observation of epitaxially grown C_{60} crystals and molecules on vacuum-deposited MgO films, *Tanaka, Kitagawa, Kachi and Kizuka* 52 (1993) 533

Investigation of heterogeneous $Cu_{1-x}Co_x$ alloys with giant magnetoresistance, *Hütten and Thomas* 52 (1993) 581

Microscopic methods, specifically for solid interfaces and multilayers

Thin film Ti/6H-SiC interfacial reaction: high spatial resolution electron microscopy study, *Bow, Porter, Kim, Carpenter and Davis* 52 (1993) 289

The defocus contrast of a θ' precipitate in Al–4wt%Cu: Fresnel fringe analysis applied to an atomically abrupt interface, *Dunin-Borkowski and Stobbs* 52 (1993) 404

A high-resolution electron microscopy study of vanadium deposited on the basal plane of sapphire, *Ikuhara and Pirouz* 52 (1993) 421

Modulated structures in the Cu–Au and (CuAu)–Ag alloys with antiphase structures of CuAu(II) type, *Watanabe, Ohsuna and Kimoto* 52 (1993) 465

Atomic structure of undoped $\Sigma = 5$ symmetrical tilt grain boundary in strontium titanate, *Ravikumar and Dravid* 52 (1993) 557

High-spatial-resolution analysis of Ge layers in Si, *Libera, Smith, Tsung and Eaglesham* 52 (1993) 564

Arsenic implantation into GaAs: a SOI technology for compound semiconductors?, *Liliental-Weber, Namavar and Claverie* 52 (1993) 570

Microscopic methods, specifically for surfaces

Atomic step imaging on silicon surfaces by scanning electron microscopy, *Homma, Tomita and Hayashi* 52 (1993) 187

Surface electromigration of metal atoms on modified Si(111) surfaces studied by REM, *Yamaguchi, Ohkawa and Yagi* 52 (1993) 306

Miscellaneous instruments

Low-energy ion optical system with a liquid-metal ion source for imaging and processing solid structures, *Driesel* 52 (1993) 65

Electron diffraction from gratings fabricated by electron beam nanolithography, *Ito, Bleloch, Paterson and Brown* 52 (1993) 347

Miscellaneous theories

Recent studies of short-range order in alloys: the Cowley theory revisited, *Reinhard and Moss* 52 (1993) 223

Effects of crystal surface roughness on X-ray CTR scattering, *Harada* 52 (1993) 233

What the latest diffraction techniques can tell us about an old material: steel, *Butler and Cohen* 52 (1993) 238

Radiation effects (experimental)

In situ domain multiplication and migration in the antiferroelectric ceramic PLSnZT, *De Graef, Clarke and Speck* 52 (1993) 179

Reflection electron microscopy, and reflection high energy electron diffraction (REM and RHEED)

Surface electromigration of metal atoms on modified Si(111) surfaces studied by REM, *Yamaguchi, Ohkawa and Yagi* 52 (1993) 306

Distorted wave approach to diffuse scattering in THEED and RHEED, *Dudarev, Peng and Whelan* 52 (1993) 393

Observation of planar defects by reflection electron microscopy, *Tsai and Cowley* 52 (1993) 400

Scanning electron microscopy (SEM)

Atomic step imaging on silicon surfaces by scanning electron microscopy, *Homma, Tomita and Hayashi* 52 (1993) 187

Scanning transmission electron microscopy (STEM)

Coherence and multiple scattering in "Z-contrast" images, *Treacy and Gibson* 52 (1993) 31

Error analysis of crystalline ptychography in the STEM mode, *McCallum and Rodenburg* 52 (1993) 85

Low-dose thickness measurement of glucose-embedded protein crystals by electron energy loss spectroscopy and STEM dark-field imaging, *Leapman, Brink and Chiu* 52 (1993) 157

Measuring the height of steps on MgO cubes using Fresnel contrast in a scanning transmission electron microscope, *Boothroyd and Humphreys* 52 (1993) 318

Thickness effects in ADF STEM zone axis images, *Hillyard and Silcox* 52 (1993) 325

High-resolution scanning transmission electron microscopy, *Liu and Cowley* 52 (1993) 335

Imaging elastic strains in high-angle annular dark field scanning transmission electron microscopy, *Perovic, Rossouw and Howie* 52 (1993) 353

Specimen preparation and handling

Ultramicrotomy: an alternative cross section preparation for oxidic thin films on glass, *Becker and Bange* 52 (1993) 73

Radiation damage in ion-milled specimens: characteristics, effects and methods of damage limitation, *Barber* 52 (1993) 101
Specific preparation procedures for failure analysis of (sub)micron areas in silicon devices, *Cerva, Huber, Eckers and Mitwalsky* 52 (1993) 127
Positive staining of protein molecules for electron microscopy: polyiodination of the apoferritin shell in ferritin, *Massover* 52 (1993) 383
Direct observation of epitaxially grown C_{60} crystals and molecules on vacuum-deposited MgO films, *Tanaka, Kitagawa, Kachi and Kizuka* 52 (1993) 533

Spectrometers

Commercial spectrometer modifications for energy filtering of electron diffraction patterns and images, *Holmestad, Krivanek, Høier, Marthinsen and Spence* 52 (1993) 454

Three-dimensional reconstruction and stereo microscopy

Automatic 3D alignment of projection images of randomly oriented objects, *Farrow and Ottensmeyer* 52 (1993) 141
High-resolution electron crystallography of protein molecules, *Glaeser and Downing* 52 (1993) 478
